

NGV Odyssey Day

November 3, 2010

A lot of consideration has been paid to natural gas and the benefits it poses to fleets across the country wishing to reduce their fuel costs and the toxic emissions produced by their diesel and gasoline vehicles. Much has also been said about the importance of natural gas being a domestic fuel and how it could help the United States reduce its dependency on foreign oil. Yet, with all of the public and political attention the fuel has been getting, two questions still remain. How much of what has been said is rhetoric and is the fuel right for all fleets? Record-high gas and diesel prices are compelling businesses and organizations to explore how to rein in fuel costs. Besides saving green, many companies are also interested in driving green.

On November 3, 2010, The Greater Houston NGV Alliance, in partnership with University of Houston and Public Solutions Group, will endeavor to answer these questions along with other important issues like fueling infrastructure, grants, and overall fleet economics. This workshop is being held to continue the steps towards building a region-wide natural gas infrastructure. This workshop will educate local governments, businesses, and school districts on the benefits of natural gas vehicles.

Event Agenda

Overview of NG Vehicle Industry
NGV Options
Fueling Station Options
Tax Credits, Incentives & Grants

Economics
Case Study
Next Steps / Q&A

Registration Fee: \$25 (until 10/22/10), \$50 (after 10/22/10).

Covers lunch, refreshment breaks and parking at the UH Welcome Center Garage.

Lodging:

Attendees arriving Tuesday evening (11/2) are encouraged to book their room by 10/15 at the University Hilton Hotel at a special "UH Hobby Center for Public Policy" rate of just \$179.00. For reservations, contact them directly at 866-327-1161.

Location:

University of Houston M.D. Anderson Rockwell Pavilion
11:00 a.m. to 3:30 p.m.

Parking:

UH Welcome Center Garage
