

Lesley Stolz, PhD

Head of
Johnson & Johnson Innovation,
JLABS California

Who wants to be an Entrepreneur??

Abstract:

Moving from being a scientist to creating or joining a start-up company can be daunting. Some people spend years planning out their move, and others stumble into it by mistake. It's an exciting time, and institutions and corporations are trying to make it easier for scientists to learn how to create and spin out companies as well as connect with sources of funding.

Dr. Lesley Stolz, Head, Johnson & Johnson Innovation, JLABS, and entrepreneurial transactions expert, will talk about some of the challenges entrepreneurs face and some of the solutions to look for from industry and academia.

Keck Seminar

Friday, November 18, 4:00 pm

**BioScience Research Collaborative
Auditorium, 6500 Main St.**

-- Networking & refreshments following --
