ETHICS IN SCIENCE

Lecture Series

Behavioral Concepts and the Sciences of Human Behavior

Helen Longino, Ph.D., Stanford University

**Friday, April 21, 2017
11:00 A.M. - 12:30 P.M.
University of Houston
232 Philip G. Hoffman Hall**

What do researchers measure when measuring behavior? This talk explores the ways behavioral concepts are operationalized/defined for scientific study, the ways in which social preconceptions and values still permeate such concepts, and some of the social consequences of the particular operationalizations adopted. The focus will be on concepts of aggression and of sexuality.
