

# Networking

with Idaho National Laboratory

As one of 17 national labs in the U.S. Department of Energy complex, Idaho National Laboratory (INL) is home to nearly 6,000 researchers and support staff focused on innovations in nuclear research, renewable energy systems and security solutions that are changing the world.

Faculty and Staff on **Feb. 21 @ 10:30 am - 11:30 am in W205 of Engineering Building 2.** Come and learn of ways to collaborate with INL and the National Lab system.

**JR Ratliff**  
Postdoctoral Specialist

*JR Ratliff is a postdoctoral specialist at INL. His primary responsibilities in this role are to build the laboratory's research capacity and to collaborate with university partners across the country. He holds a doctorate from Bowling Green State University, a master's from Michigan State University, and a bachelor's from BYU-Idaho.*
